

SALTEC at Bauma 2013

■ New machines TORGAR will be showed in F11.1103/7

The new equipments that we are showing are:

- Small Industrial lift PT-02 specially designed for lifting people in tower cranes and other temporary and permanent uses.
- Transport Platform PL-20, for lifting people or materials, with a maximum capacity of 2.000kgs.
- Work Platform PW-6/12, light but robust, specially designed for renovation jobs in façades (photo)
- Work Platform PW-18/35 + Passenger Hoist T1-08, combining working in façades and lifting people on the same mast.

New Work Platform PW-6/12

- Maximum length: 24,6meters
- Maximum lifting load: 2.000kgs.
- Maximum standard height: 120 meters
- Platform width: 0,7 meters.

■ SALTEC equipment in more than 30 countries all around the world

Besides residential and non residential construction and renovation sites, we also have permanent installations in Mining, Power plants, Pulp & Paper plants, Cement Plants, Chemical Plants or ATEX installations.

Our machines are also involved in the reconstruction of the “Sagrada Familia” (Holy Family Church) in Barcelona where we have 4 single and 1 twin cage Passenger Hoists.

■ SALTEC Elevation Solutions during more than 40 years

In our main factory located in Zaragoza (Spain) we manufacture vertical access equipment -branded as TORGAR- through rack and pinion system for the construction and industrial sectors.

Our main products are: Passenger and Material Hoist, Industrial lift, Material hoist, Mast Climbing Work Platform and Transport Platform.
